## Hexham Bus Station options - feedback form

Please consider the analysis of options for the future of Hexham Bus Station and provide your comments and feedback on the form below.

1. The eight site options have been analysed against 27 criteria under five themes of: **accessibility, functionality, sustainability, safety and security**, and **cost** (\*see overleaf for further details of what was considered under each theme).

Please tell us about any additional issues that you think should have been considered:

2. Please tell us what features are important to you in a new bus station:

3. Please add any other comments that you would like to make:

4. Please tell us the name of the town or village you live in, and your postcode:

**\*What was considered under each theme:**

**Accessibility**

Options scored highly where they had excellent connectivity - proximity / gradient / ease of access - to other services such as the town centre, train station, pedestrian network or public car parking.

**Functionality**

Options scored highly where they had the land available to provide the facilities expected of a 'good' bus station facility. This includes customer and staff facilities and the space to enable buses to drop-off / pick-up, layover and manoeuvre safely within the site.

**Sustainability**

Options scored highly where they minimised the impact on the landscape, maintained the heritage of the area and offered a positive impact on trade and the economy.

**Safety and security**

Options scored highly where they minimised potential conflict points - between buses, between buses and pedestrians, and between buses and other vehicles - within the proposed site. The personal security of staff and passengers was also an important consideration.

**Cost**

Options scored highly where no land purchase was required and where the site presented no significant building issues, for example steep gradient, poor ground conditions etc..
